

Environmental technology (envirotech), green technology (greentech) or clean technology (cleantech) different aspects of environmental science, green chemistry, environmental monitoring with the application of technologies to monitor, conserve the environment and natural resources and to curb the negative impacts of human intervention. The term is also used to describe sustainable energy generation technologies such as photovoltaic, wind turbines, bioreactors and so on. Sustainable development is the core of environmental technologies. In other words environmental technologies is also used to address the use of electronic devices that can promote sustainable management of resources

Environmental technology and its sustainability are specialized area of study that brings together many aspects of engineering, environmental science, sustainability, ecology, law, pollution prevention, climate change, contamination mitigation, and technology needed in today's modern world. Global Youth Forum gives an opportunity to understand, share, contribute and apply the best methods and practices used in green environment. As mentioned above, the technologies and practices presented in the program are the foundation for improving environmental conditions and achieving the sustainability goals.

"Combat Pollution" - Modern Technologies for Pollution Control.

OISCA International

OISCA International, the NGO with General Category status was conferred by the United Nations, established in 1961 with its Headquarters at Tokyo, Japan. The South India chapter of OISCA functions in Calicut, since 1985. The prime objective of the SOUTH INDIA CHAPTER OF OISCA is to impart knowledge, create awareness in key areas of environmental protection and empowerment of youth and women. We co-ordinate the activities of Love Green Clubs in 1770 schools and Save Green clubs in 150 colleges. The South India Chapter has 104 regional chapters and have more than 5000 members. As a recognition to these activities, Government of India bestowed OISCA by conferring the "INDIRA PRIYADARSHINI VRIKSHA MITHRA AWARD" in the year 1998.

OISCA encourages and implements environmentally sustainable developmental programmes through a holistic approach in areas of agriculture, ecological stability and human culture and spirituality. To accomplish this, OISCA conducts hands on experimental training programmes for citizens of all ages worldwide. These programmes have enabled us to transmit knowledge and skills, and cultivated spiritual qualities like dedication, self reliance and universal brother hood in man.

OISCA South India Chapter is also empanelled with NITI Ayog, Government of India, Ministry of Textiles, Ministry of Minority affairs, NACO, KRWSA and TISS.

GLOBAL YOUTH FORUM

OISCA International conducts International conferences at different countries on various topics. Global Youth Forum, a world forum initiated by OISCA for the empowerment of youth also conducts programmes. During 2018, The Global Youth Forum will be organized under the theme ENVIROTECH 2018 in association with the Xavier Institute of Management & Entrepreneurship, A World Class Business School at Kochi, South India, during February 9 - 11th, 2018.

These programmes will develop a common platform to promote friendship and co-operation among youth of different countries. This interactive platform offers young social innovators to openly communicate, share ideas and experiences with peer group from different cultural backgrounds and regions around the globe. Furthermore participants will receive advice and guidance from experts and get inspired and motivated so that it will lay down the foundation for creating a green world.
